

Sound-proof Series Crusher Machine (TLPP/TLEP)

Sound-proof Series Crusher Machine (TLPP/TLEP)

- Sound-proof plastic crusher is suitable for crushing all kinds of plastic materials, including waste produced after injection molding, blow molding or extrusion molding.
- High-quality alloy steel blades, good toughness, wear-resistant, adjustable blade expansion, It can be used repeatedly.
- The crusher adopts fully enclosed structure and is equipped with sound insulation device, which can effectively reduce the noise Stay 1m away from the machine, the noise value is about 80-90dB when crushing soft plastics, and about 85-105dB when crushing hard plastics.
- Adopt current relay, motor overload protection and multiple safety protection devices.
- The plastic crusher can be equipped with auxiliary equipment, such as: conveyor belt, immediate recycling system, immediate recycling dust removal system, metal separator, powder screening system etc. and accept customization.

Alloy steel blade

The cutting blades is made of high-strength alloy blades steel, which has high hardness and strong wear resistance. The blade grinding can be reused.

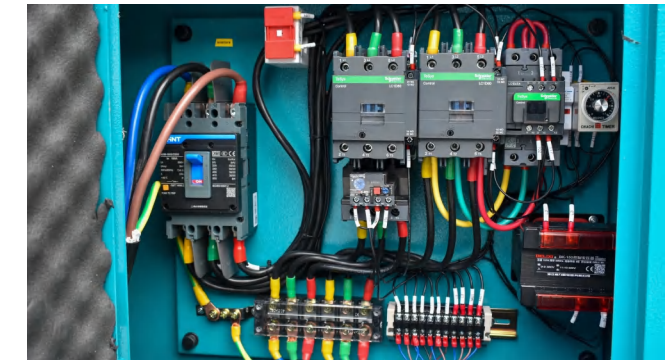

Copper core motor

Adopt brand motor, pure copper core, low energy consumption, strong power and durable.

Silent chassis

Thickened chassis, enclosed sound insulation device for multi-dimensional noise reduction.

Brand Electrical Appliances

By controlling the actions of electrical appliances, control of machine operation and shutdown protection equipment, adjustment of work, etc. can be achieved.
